Men's

ELF Notes

- ELF styles follow the same standard as their respective product categories, with sourcing note and brand note (for applicable brands).

Category Level Image Notes

- If not specified, Men's styles follow the same image guidelines as other categories such as Accessories, Footwear, and ELF accordingly.

- Product should be shot straight at the model, not from above or below the model.

- Suits should be shot full length, not cropped in.

- Tops/jackets that fall below the hips should be shot full length.

- Bottoms shouldn't have a top that obstructs the style's waistline.

- Model posing shouldn't obstruct view of product.

- Full product should be visible.

- If we're given a full body crop but need to crop in on the top or bottom, the image will need to be **at least** 2500 pixels tall with the model filling the entire 2500 pixels so the product is clear when we crop in on it.

- If cropped for the featured product (top, bottom, bra, etc.) the image should be **at least** 2000 pixels tall.
