# General requirements for Images for all categories

(Please see category-specific requirements--separated by product type--on the pages that follow.)

<p><b>Image resolution:</b> 72dpi or higher</p> <p><b>Image format:</b> JPG, TIF, PNG, or PSD.</p> <p><b>Image colorspace:</b> RGB</p> <p><b>Image profiles:</b> sRGB or Adobe RGB (1998) are preferred</p>	<p>Images should be taken with a professional camera with studio lighting.</p> <p>Images should be color accurate by neutrally balancing with an industry standard grey card or color checker.</p> <p>Images should feature entire product clearly.</p> <p>No portion of the product should be completely in shadow or blown out, including the model.</p> <p>Product should stand out from the background.</p> <p>Background should be plain, <b>preferably white</b>.</p>	<p>Product itself should fill as much of the frame as possible. When considering image size, the background ultimately doesn't count toward the product size. Ex. - Image is 2000x2000px, mostly background fill, but product is only 500x300px, which would make it below standard.</p> <p>Images should be in focus and clear.</p> <p>Images shouldn't be upscaled from a smaller image to fit RGG standards.</p> <p>Product and background should be free of dirt and blemishes.</p> <p>No hard edge shadows. Soft shadows are fine, but <b>no shadow is ideal</b>.</p> <p>No text or watermarks on images.</p>

# Men's

## Category Level Image Notes

- Product should be shot straight at the model, not from above or below the model.
- Suits should be shot full length, not cropped in.
- Tops/jackets that fall below the hips should be shot full length.
- Bottoms shouldn't have a top that obstructs the style's waistline.
- Model posing shouldn't obstruct view of product.
- Full product should be visible.
- If we're given a full body crop but need to crop in on the top or bottom, the image will need to be a minimum of 2500, or more, pixels tall with the model filling the entire 2500 pixels so the product is clear when we crop in on it.
- If cropped for the featured product (top, bottom, bra, etc.) the image should be 2000, or more, pixels tall.

# Men's

## ELF Notes

- ELF styles follow the same standard as their respective product categories, with sourcing note and brand note (for applicable brands).

## Category Level Image Notes

- If not specified, Men's styles follow the same image guidelines as other categories such as Accessories, Footwear, and ELF accordingly.

- Product should be shot straight at the model, not from above or below the model.
- Suits should be shot full length, not cropped in.
- Tops/jackets that fall below the hips should be shot full length.
- Bottoms shouldn't have a top that obstructs the style's waistline.
- Model posing shouldn't obstruct view of product.
- Full product should be visible.
- If we're given a full body crop but need to crop in on the top or bottom, the image will need to be a minimum of 2500, or more, pixels tall with the model filling the entire 2500 pixels so the product is clear when we crop in on it.
- If cropped for the featured product (top, bottom, bra, etc.) the image should be 2000, or more, pixels tall.
